

March 1-5, 2010

5 day course 9AM-6PM

THIS COURSE WILL BE HELD AT:

Sacramento, CA

This course is for home improvement professionals who want to understand the basics of building science and whole-house-as-a-system to identifying and solving indoor air quality, comfort and air leakage problems in residential buildings.

This training can help develop new opportunities for your business by providing your customers a energy efficient, comfortable & durable home.

The 5 day course prepares the professional to conduct a comprehensive inspection and diagnostic analysis of a house using state-of-the-art diagnostic tools. The complete analysis includes a comprehensive evaluation and documentation of the building shell, assessment of the efficiency and safety of the mechanical systems and a recording of lights, appliances and other components of the home's base load energy use.

- (4) 8-hour days of classroom instruction**
- (1) 8-hour day of field training and BPI written exam**

Building Performance Institute (BPI) Field Testing to be offered at a later date.

WHO SHOULD ATTEND

HVAC, Electrical & General Contractors, Remodelers, Installation Crews, Raters, Auditors, Inspectors, Builders, Realtors, Sales Representatives, Architects, Business-Professionals & Consultants Designers, Engineers.

COST

\$795
